

Intro Programming Unit 3 – Test Review

4 pages, 40 points

32 questions:

9 T/F questions

5 Multiple Choice questions

6 questions from Worksheet 1

2 questions from Worksheet 2 (10 pts)

10 questions from Worksheet 3

Know:

`getCurrency()`, `getPercentInstance()`, and `getNumberInstance()` are members of the `NumberFormat` class

`DecimalFormat()` rounds

The `Stdin` class is not a standard Java class

`readString()` etc. are from the `Stdin` class

wrapper class – is used to parse a string and make objects out of primitive data
ex.) `Integer.parseInt(x)`

Know the difference between `Integer` and `int` or `Double` and `double`

Classes must be imported except `java.lang` which includes the wrapper classes

`JOptionPane` is a class that is used to create an input dialog box

Special Operators: `++`, `--`, `+=`, `-=`, `/=`, `*=`

Also Study: In your textbook Sections 2.6 (wrapper classes), 2.9

(Note: Most of the test is from the lecture, labs, and worksheets - not much from the book to study.)
