

## AP Unit 5 Program

1 of 1

Pts: 10

Name \_\_\_\_\_

class hour \_\_\_\_\_

I. Write a program with Class name of **AP1ch05Program** that will input, from the keyboard, a character and uses a **switch** structure to output:

"it's a vowel" or  
"might be a vowel" (for an input of 'Y') or  
"not a vowel"

Further specifications:

- a) Do not use the above statements more than once in the coding!
- b) Use a default for one of the above.
- c) The command **case** should be used six times
- d) Only **lower** case characters will be input at this time
- e) Save as **AP1ch05Program** then compile, run, and debug.

When perfect, show your teacher the coding and output (run).
